MESSAGES FOR THE WORLD RADIO HANDBOOK

Peter Aylen

UNITED NATIONS

The year 1956, with its expansion of United Nations membership from 60 to 76, has been for us in the UN Radio Division a year of challenge and of opportunity.

The opportunity lay in our being able to carry word about the aims and activities of the World Organisation to millions more in many parts of the world. The challenge was posed by the need to reach these millions in an idiom with which they are familiar.

This meant that in making the fullest use of our opportunity and in meeting the challenge adequately, we needed authentic, accurate and comprehensive information about the radio and television patterns and facilities of our new target areas.

In the context of all this diverse information the World Radio Handbook has played its part. We have always found this publication a reliable, comprehensive and readily-accessible source of up-to-date information on programmes, transmitters and wavelengths of radio stations all over the world. It continues to be most useful to those of us who are responsible for establishing and maintaining necessary links with national radio services.

Today, with our expanded contacts with national radio organisations, we have all the more reasons to express to you our genuine appreciation of the valuable contribution which you are making to the field of international broadcasting through the publication of The World Radio Handbook for Listeners.

Peter Aylen,
Director, Radio Division
United Nations

UNESCO

The 1956 edition of the World Radio Handbook has just been published. The handbook, which has become an institution in the radio profession, offers a practical survey of radio and television services in most countries. It is a useful tool in helping broadcasters promote programme exchanges and liaison with radio organizations in other countries. It is also a valuable means of increasing international listening audiences.

Unesco Bulletin.

UNITED STATES INFORMATION AGENCY:

It gives me a great deal of pleasure to congratulate you on the Tenth Anniversary of the publication of the WORLD RADIO-TELEVISION HANDBOOK. The publication of the information concerning all international broadcasting stations helps to promote a better understanding between the peoples of the world. We at the U.S. Information Agency have the same objective and appreciate the facts that the WORLD RADIO-TELEVISION HANDBOOK is available as a source for the program schedules of our Voice of America. We hope that the coming years will be as successful as the first ten in the life of the WORLD RADIO-TELEVISION HANDBOOK.

Theodore C. Streibert
Director, U.S. Information Agency.

ARMED FORCES

RADIO AND TELEVISION SERVICE:

I wish to assure you that the latest edition of your very excellent publication, World Radio Handbook, was received by us and perused with great interest. You have done a fine job with this publication, and I am sure it will find multitudes of interested listeners the world over. I wish also to assure you that the handbook has been placed in the hands of our news feature people for appropriate mention on our shortwave transmissions. Again, congratulations on your outstanding publication, and best wishes for its continued success.

Joseph J. Koshire, CWO, USA Adjutant

INTER-AMERICAN ASSOCIATION OF BROADCASTERS

We are happy to be able to congratulate you with the WRH, which after our opinion as a reference book of great value for as well listeners as broadcasting organizations.

Julio Menadier Carrasco, Director General

CAMARA ARGENTINA DE TELEVISION

My personal congratulations on the WRH, for a publication of great clarity, accuracy and abundance of information, for the patient painstaking work of getting together so many details which are presented in the Handbook as a valuable panoramic view of radio communications. I think every owner of a radio set all over the world should have his WRH.

E. E. Grinberg, President

ISRAEL BROADCASTING SERVICE

Your handbook has proved to be a most valuable source of information and we are happy to cooperate with you. Harry Zinder, Director Gen.

MANILA BROADCASTING COMPANY

As for the message expressing the value and purpose of the WRH, we find it an invaluable source of worldwide information and data, that is a MUST for any or all commercial broadcasting stations to possess. World Radio Handbook is rated by us down here as the Encyclopedia of Radio Broadcasting facilities. Guillermo Hernandez, Comptroller

NEW ZEALAND BROADCASTING SERVICE

May we conclude by wishing you every success with the 11th edition of your world famous Radio Handbook.

A. L. Curry, Director
Short Wave Service

EL SECRATARIO NACIONAL DE RADIODIFUSION DEL MOVIMIENTO

I congratulate you with the tenth edition of yours WRH which improves the already great advantages of previous numbers. Indeed, - this book increases the international understanding with the exchange of information, and therefore, it deserves our best wishes.

PREFACE

The Head of UNESCO's Radio Division, Walter Steigner, has kindly sent us the following preface to the eleventh edition of WRH:

Is it really necessary to write a foreword to this World Radio Handbook?

Not if it is to inform readers of the usefulness and the necessity of a work of reference which is as indispensable as a telephone directory. This fact has been fully proved by the first ten years of the World Radio Handbook's existence.

However, there *is* a reason for a foreword. In this handbook, all radio and television stations are peaceably united. But the situation on the ether is not quite so peaceful...

A great effort will be required on the part of all those of good will if the peace that exists in the pages of the World Radio Handbook is to be brought to the waves of broadcasting.

The young people of to-day can hardly realize how great is this gift that we call radio to humanity. The older ones among us will not forget, however, how amazed we were when for the first time – with the aid of a detector apparatus – we were able to receive music and words out of the air.

A great gift, which can be both good and bad. Good, when it serves understanding between nations, free exchange of news, of culture and of freedom. Bad, when it serves to teach contempt of other nations and races, when it restrains freedom and preaches political agitation.

The World Radio Handbook is to be congratulated on giving in its collection of all radio and television stations an objective picture of the world of radio. If we are to improve things, we must base ourselves on facts.

It is the desire of all listeners that radio should serve the cause of peace. When will it be possible to write a post-scriptum to the sad chapter of the history of radio, the chapter of war on the ether? The World Radio Handbook would be happy to be able to publish this postscriptum soon, and knows that here it has the support of all those who are active in radio and television, and all those who – as inhabitants of our world which has become so small in this era of technique – appreciate radio and television as a means of entertainment, instruction and teaching.

Walter Steigner

Director UNESCO RADIODIVISION

I hope that with this edition of the World Radio and Television Handbook it has been possible to bring the contents a step nearer perfection, and that it will be received with the same satisfaction as the earlier editions by radio stations, readers and advertizers all over the world. The result is primarily due to the ever increasing interest shown in the work of WRH by all broadcasting organisations, radio and television stations, and numerous listeners all over the globe, who are asked to accept my sincere thanks for valuable cooperation and many friendly and encouraging letters during the course of the year. I trust that the same will prove to be the case in the future.

My greatest wish for the coming year is that the radio war in the ether may cease, that the jamming stations stop their activities and allow broadcasting to serve its actual purpose: the promotion of understanding between the peoples of the earth. A continuation of the radio war serves no purpose other than the reciprocal destruction of all broadcasts.

Finally, hearty thanks to the United Nations and UNESCO's Radio Divisions, to the European Broadcasting Organization at Geneva, the International Broadcasting Organization at Prague, Asociacion Inter-Americana Radiodifusion in Chile, many Danish Embassies, Legations and Consulates abroad, and the Danish Society for valuable assistance in the past year.

WHAT HAS UNESCO TO DO WITH RADIO?

(A simple question – a rather difficult answer)

Unesco is happy to serve the radio organizations of the world and this in a purely, practical field in this connection, I may mention the agreement on the importation of sound recordings of an educational, scientific or cultural character for use exclusively in public or private educational, scientific or cultural institutions or societies, including, at the discretion of the importing country, broadcasting organizations—duty free!

That is surely a practical contribution and a success which Unesco will endeavour to enlarge upon. It was a clear sign of bureaucracy that, when faced by the demands of new developments of science and technique, Customs authorities would not let a tape through without charge, whereas the same tape could be played over by telephone from one country to another.

Anyone who has ever spoken to a television reporter who has tried to cross from one country into another with his obviously valuable equipment, will be amazed by the difficulties which have to be faced at the customs, despite the fact that radio and television are, after all, intended to help different nations and cultures to get to know each other. Along this prickly path Unesco is active too. But here it is necessary, first of all, to gather all the basic material and facts, in order to create new international agreements. Unesco is examining the conditions governing the temporary import, for programme exchanges, of technical equipment used in broadcasting or television. A preliminary study of this question led to the conclusion that the best way of carrying out this enquiry was to send a questionnaire to all radio and television organizations in Member States, asking them to specify the nature and extent of the difficulties encountered by them in practice. Questions concerned not only exchanges of programmes already recorded, but also cases in which a broadcasting organization sends one or more technicians with the necessary equipment to another country for the preparation or retransmission of a programme on the spot. A study of particular instances, which might be indicated by those concerned, would make it possible to carry out a thorough enquiry into this whole problem, which is daily assuming greater importance owing to the remarkable expansion of broadcasting and television.

Unesco is working in these fields, which in Unesco-language are called “Free flow of information” and “Removal of obstacles”. And at the same time, the sad fact of the battle of the wavelengths, which is in the process of killing short-wave, encourages us again and again to search for solutions and progress—even if only small—towards peace on the ether. Here, questions of technique are mixed up with questions in other highly significant fields which an international organization like ours must approach with great care and tact.

If Unesco-Radio Division concerns itself with programmes, this is not in order to interfere where we are not wanted, for instance, in the tasks and work of existing international radio organization. But where promotion of culture, science and education is concerned, help can only be welcome and if there are gaps in international collaboration of radio, Unesco would seem—by the will of its Member States—to be there to close these very gaps. In May of last year (1956), we had the pleasure of bringing together in Unesco House, Paris, outstanding programme directors and radio authors from the 12 most important radio countries in the world. The main purpose of this meeting was to provide the participants with an opportunity of exchanging their experiences and techniques with regard to cultural broadcasts and also discussing the possibilities of more programme exchanges. A comprehensive series of reports was submitted by the Secretariat and discussed by the meeting. These reports and a summary of the discussion were made available to radio broadcasting organizations in all Member States.

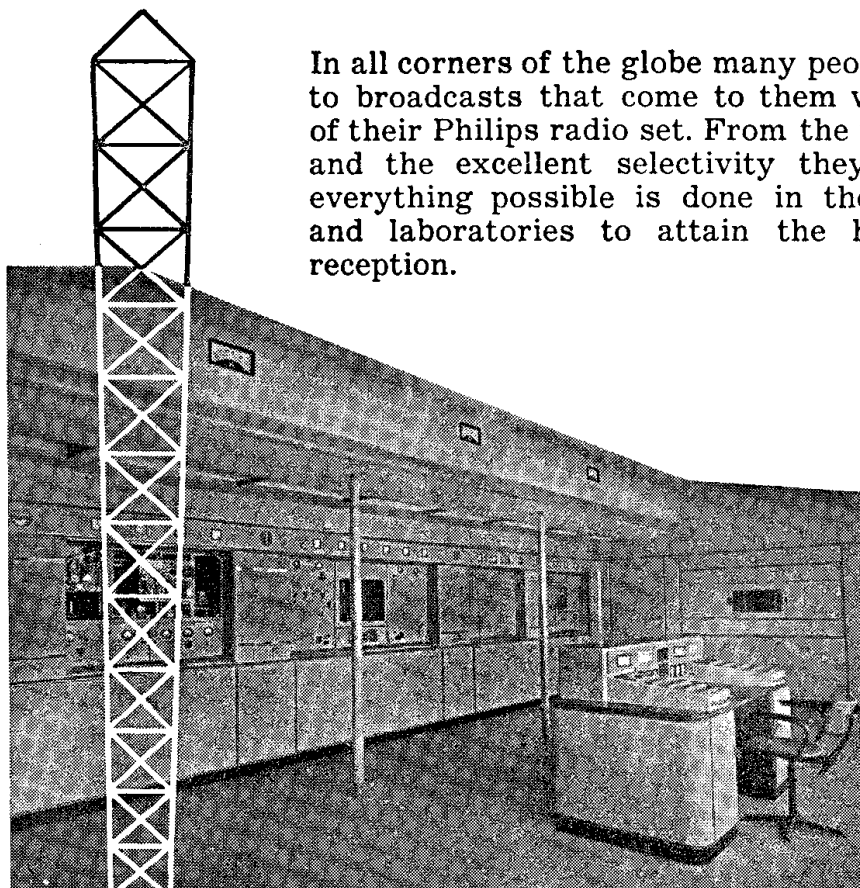

After a particularly fruitful exchange of ideas the participants drew up a statement from which I quote: “While there is already considerable international exchange of programmes, notably in some areas of the world, an increase—particularly in programmes of a cultural nature—is highly desirable. Each country, should make its best programmes freely available to all other countries wishing to use them...”

We hope, this year, to be able to invite experts of programme exchange, chiefs of international relations, together with programme directors, in order to compare the outstanding achievements of different radio organizations and to establish new personal contacts. And we are happy to note, that these efforts are meeting with great interest. Radio and television are not opponents; they are here to work together. The competition with television will give wings to radio to improve the cultural quality of its own programmes and programme exchange, and vice-versa.

Unesco has just completed its first decade in the work for peace and progress. This is a short period for such a great task. Rome was not built in a day; it might be possible to build a better world, if we never lose courage nor patience. Radio has a strong influence on public opinion—and it is for this reason that Unesco has to do with radio.

A quality link between

In all corners of the globe many people will be listening to broadcasts that come to them via the loudspeaker of their Philips radio set. From the purity of the sound and the excellent selectivity they will realize that everything possible is done in the Philips factories and laboratories to attain the highest quality of reception.

ZOO

Real radio enjoyment, however, is not only dependent upon the quality of the receiving set. The broadcasting stations have to give careful thought to the composition of their programmes. Much time and money is taken up by the selection of good talent and last but not least the technical equipment has to be in perfect condition.

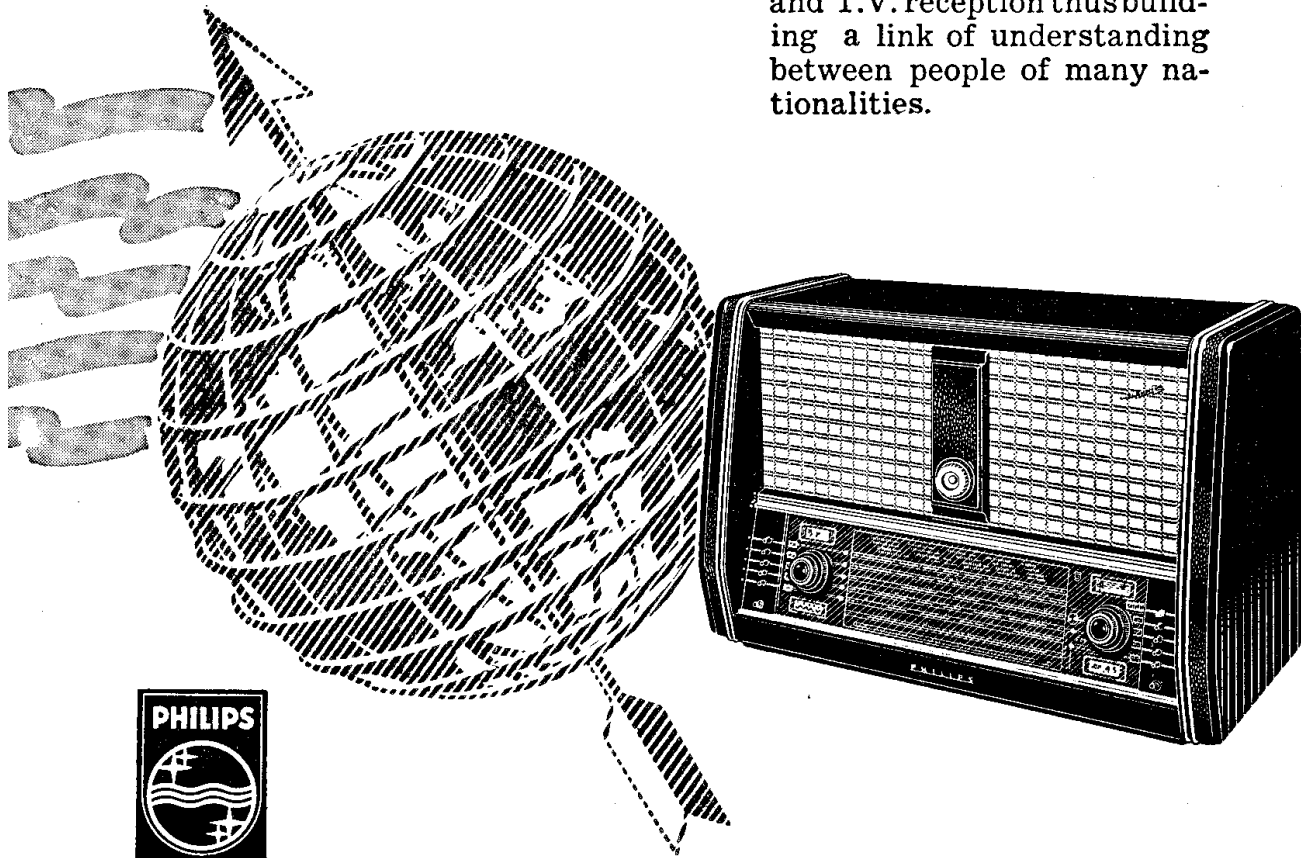

PHILIPS *for dependable*

speaker and speaker

Also at this end of the „bridge” between the listener and the studio Philips play an important part.

Just as they make many types of Philips radioplayers, they manufacture quite a range of different studio equipment and transmitters ranging from 50 watts to 100 kilowatts and comprising types for different wavelengths and modes of modulation. Also in the field of television Philips equipment forms a quality link between camera and screen.

By producing quality equipment for both the broadcasting stations and the home, Philips contribute their share towards better radio and T.V. reception thus building a link of understanding between people of many nationalities.

transmission and reception

HOW TO USE WORLD RADIO HANDBOOK

The practical information given in the following section in respect of the broadcasting services of each individual country includes:

Local Time and Languages used are indicated for each country.

The Addresses of the broadcasting companies in question. Where broadcasts are commercial this is stated.

Names and Titles of the leading personalities in each company.

List of Stations (A. M., F. M.) operated by each company with call signs of their transmitters, all frequencies and wavelengths (medium-, shortwave, ultrashortwave), as well as their power expressed in kilowatts or watts.

Each short-wave station has its own identification call sign consisting of 3-5 letters or a combination of letters and figures of which the first, or two first, denote the nationality in accordance with the international list of station prefixes. (See page 22.) Some short-wave stations, the American ones for example, use these call-signs when announcing themselves.

Long and medium wave stations are divided into three categories, viz. (1) **Main Stations**, which are so powerful that they can generally be heard throughout the whole area of the country in question, and from which most of the broadcasts emanate; (2) **Regional Stations**, which can be heard only within a certain area of the country, and whose broadcasts consist partly of re-transmissions of the programmes of the main stations and partly of their own programmes; (3) **Relay and Local Stations**, which mostly re-transmit main station programmes. These relay stations are the weakest, and are local stations which can be heard only within a limited area. The above-mentioned stations are all **AM stations**, i.e. amplitude-modulated stations. In addition, there is a fourth category of stations: 4) **FM stations**, i.e. frequency modulated stations, in order to give listeners a reception free of interference. These stations have only a very short radius, and are consequently local stations.

Most short wave stations use directional aerials, i.e. their broadcasts are directed toward particular areas, and these give the names to the various services: European Service, Near Eastern, Middle Eastern, Far Eastern, Pacific, Latin-American, Caribbean Service, etc. Language and frequency employed vary according to the area to which broadcasts are directed.

Times are shown on the 24 hours system. In this system midnight is 00.00 hrs., 3 am: 03.00 hrs., 10 am: 10.00 hrs. and midday 12.00 hrs. Instead of starting again at 1 o'clock, as the 12-hour system does, the 24-hour system continues to increase the number of each hour until 23.59 (11.59 pm.) is reached. Thus 13 hrs. is 1 pm., 17.00 hrs. 5 pm. and so on. The great advantage of the system is that it eliminates any possible confusion between times a.m. and times p.m.

On page 18 you will find a Local Time Conversion Table which gives the local times (summer and winter) in most parts of the world in relation to Greenwich Mean Time (G.M.T.). For example, from September to May it is 15.00 hours New York time when it is 20.00 hours G.M.T., since the table indicates that local time in New York is 5 hours ahead of G.M.T. From May to September U.S.A. introduces daylight saving time and, consequently, it is 16.00 hours New York time when it is 20.00 hours G.M.T.

Frequency and wavelength. Frequency and Wavelength are divided into the following groups: **Long waves, medium waves, short waves and ultra short waves** (V. H. F. - very high frequencies - FM).

The wavelength of a station is measured in metres, and kilocycles per second (kc/s); for FM-stations in megacycles per second (mc/s). A kilocycle is 1000 cycles; a megacycle 1,000,000 cycles.

As the velocity of propagation in space is, in round figures, 300,000,000 metres per second, any of the quantities—metres, kilocycles or megacycles—are readily converted into the other forms by means of the following formulae:

Metres to Kilocycles

$$\text{Metres} = 300,000 / \text{Frequency (kc/s)}$$

Kilocycles to Metres

$$\text{kc/s} = 300,000 / \text{Wavelength (metres)}$$

Metres to Megacycles

$$\text{Metres} = 300 / \text{Frequency (Mc/s)}$$

Megacycles to Metres

$$\text{Mc/s} = 300 / \text{Wavelength (metres)}$$

Continued page 13.

R. C. A. BROADCAST TRANSMITTERS AT REDUCED PRICES

3 types of R. C. A. Broadcast Stations are offered at reduced prices for payment in sterling.

- ★ 250 BRM Medium Wave 250-275 W
- ★ 250 BRS Short Wave 250-275 W
- ★ AVT-22-BRS Short Wave 5 KW

All 3 models combine the highest efficiency compatible with modern broadcast standards and are fully tropicalized.

Installation and Maintenance contracts can be undertaken.

Summer at the Southern Coast

How to use the WRH, continued from page 10.

Shortwave broadcasting takes place mainly on the following metre bands (m.b.):

49 metre band – 41 metre band – 31 metre band – 25 metre band – 19 metre band – 16 metre band – 13 metre band and 11 metre band.

Many short-wave stations lie outside these bands. The 60 and 80 metre bands are used for local broadcasting, i.e. for reception over relatively short distances, which applies, for example, to many South and Central American stations and stations in Central Africa.

In the following pages you will find a large variety of call-signs and frequencies. In many cases these belong to the same transmitters which are connected to different aerials designed to radiate signals to the best advantage in respect of each service. The various call-signs usually serve to identify individual frequencies.

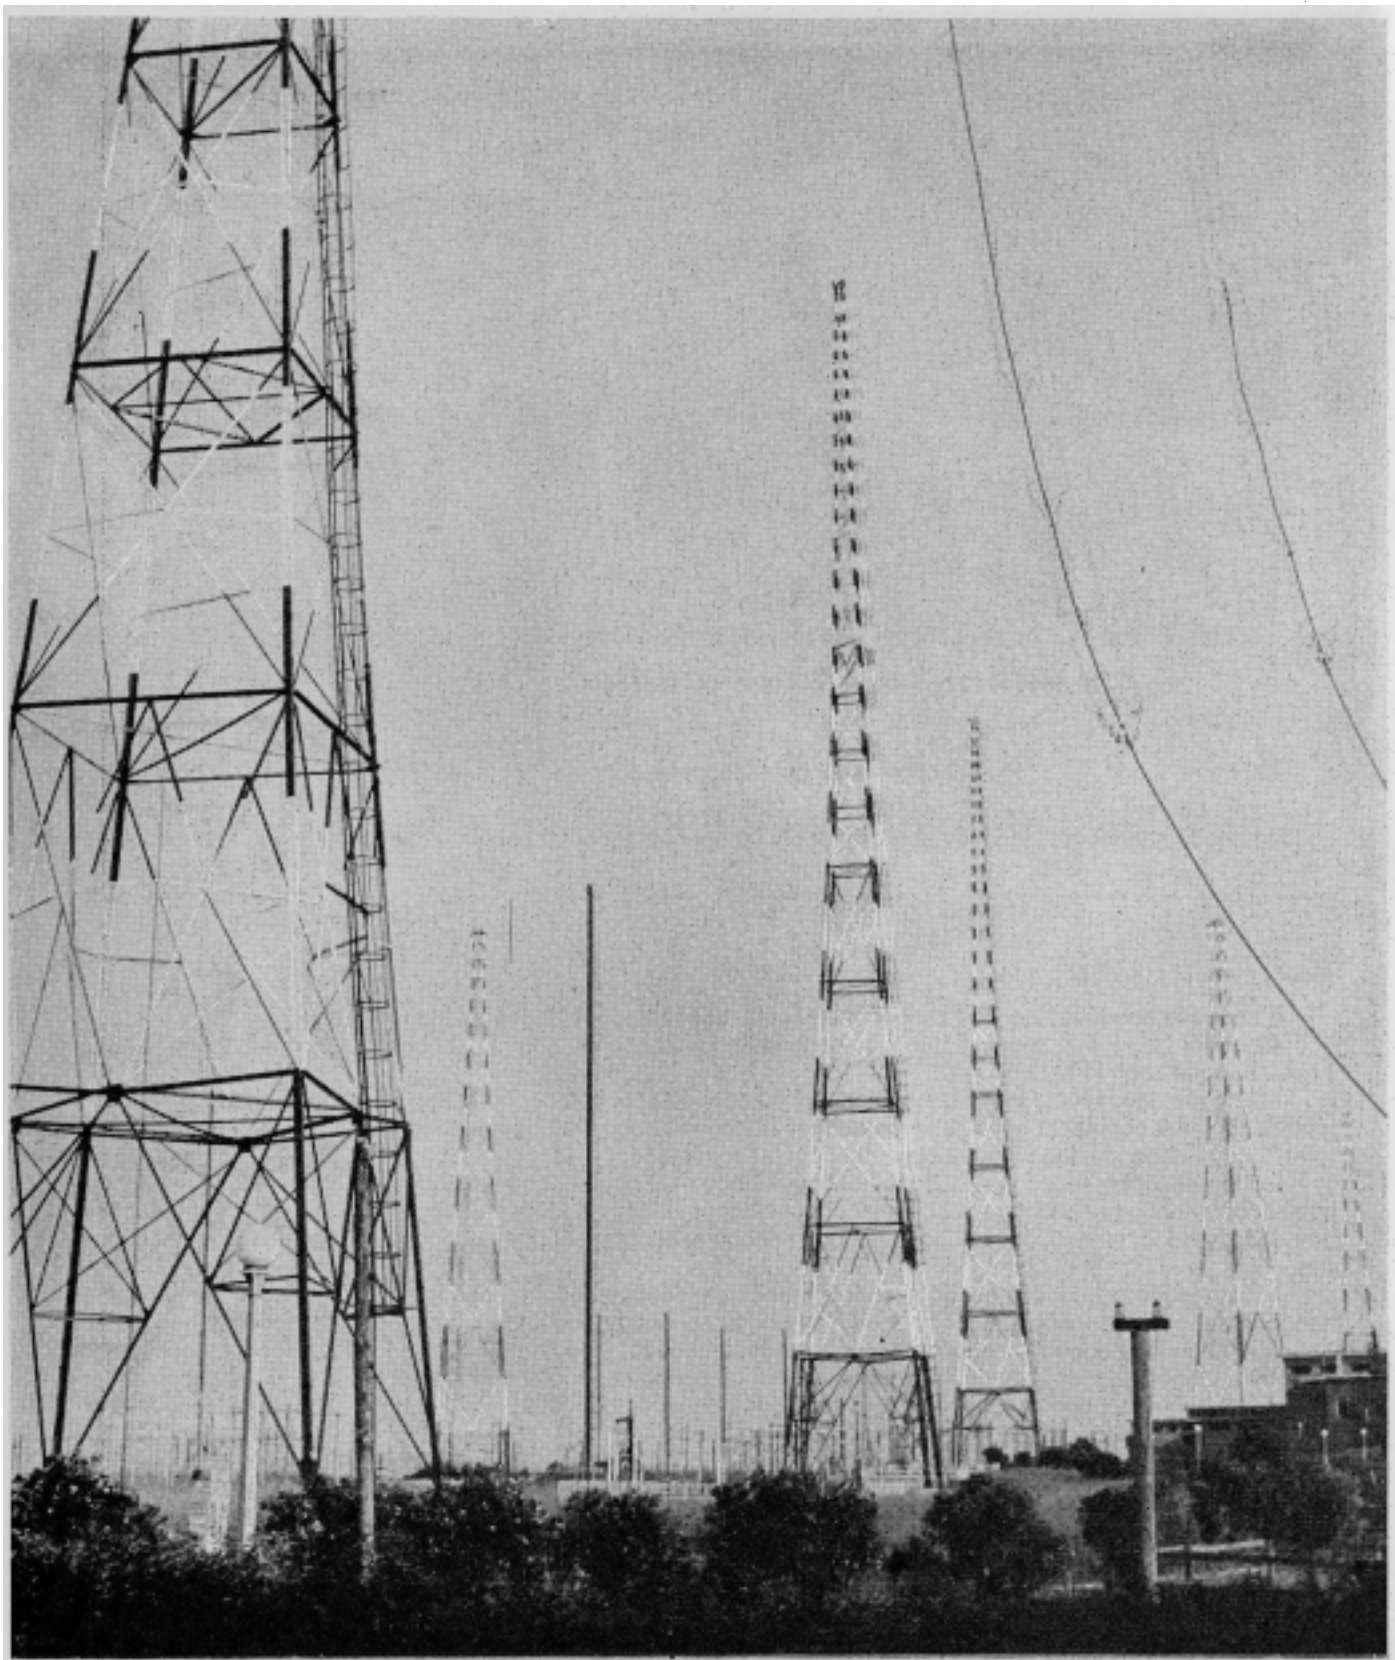

Many programmes are broadcast simultaneously from several transmitters on different frequencies, which enables you to select the one which is the most clearly audible in your area or on your particular receiver. If reception on one of the frequencies used is poor, you should examine reception conditions on the other frequencies employed by the same station. On page 24 you will find a table of the most suitable metre bands for best short-wave reception in every part of the world at various times of the day throughout the year 1957.

Daily Programmes: Under this heading you will find information concerning the total broadcasting hours on the different frequencies employed during transmission hours, as well as a survey of the news, and other fixed programmes of interest: National music, mailbag, language lessons, weather reports, program preview, time signals etc.

Announcements: The language alone is not a conclusive indication of the origin of a broadcast to which you may be listening. Hearing a programme in French or Spanish, for instance, does not necessarily mean that it is transmitted by a French or Spanish station respectively. To make sure of identifying a station correctly, it is, therefore, essential to wait for the announcement which every station broadcasts at regular intervals. These call signs are given in this book for practically all the stations listed.

Interval-Signals: For identifying stations it is also of importance to know the signals used during the intervals between programme items. Under each station you will, therefore, find a indication of the type of signal used, and in many cases a reproduction of the musical notes of this signal.

INTERNATIONAL SERVICE

RADIO CANADA

SERVICE INTERNATIONAL

Shortwave service in 15 languages

On request, we will send you our illustrated Program Schedule regularly.

Recorded programs are offered free to radio organizations.

We invite shortwave listeners to tune in on broadcasts from Canada. Full coverage is given to Canadian and world-wide news and Canadian thinking on current affairs. Programs also include actuality reports on national events, press opinion, and music. We welcome correspondence about programs and reception, and reply by letter or by verification (QSL) card.

Post Office
Box 6000,
Montreal,

BROADCASTING ORGANISATIONS

UNION EUROPEENNE DE RADIODIFFUSION (U.E.R.)

Seat and Administrative Office: 1, rue de Varembe, GENEVE.
Technical Centre: 4, rue de la Vallée, BRUXELLES.
Monitoring Centre: Jurbise (Belgium).
International Coordination Centre for TV/Programmes exchanges (Eurovision): Palais de Justice Bruxelles.

Administrative Council (1957-1958): President: Sir Ian Jacob, Director General, The British Broadcasting Corporation.
Vice-Presidents: MM. Léon Daumard, Inspector General "Radiodiffusion-Télévision Française" and Georges Conus, Director Administration The Swiss Broadcasting Corporation.

Administrators: Representatives of the broadcasting organisations in: Austria, Denmark, Finland, France, Germany (Fed. Rep.), Italy, Netherlands, Switzerland and United Kingdom.

Director of the Administrative Office and Secretary General: M. Léo Wallenborn.

Director of the Technical Centre: M. Georges Hansen.

Active Members: The broadcasting organisations of: Austria, Belgium, Denmark, Egypt, Finland, France, Germany (Bundesrepublik), Greece, Iceland, Ireland, Italy, Lebanon, Luxembourg, Monaco, Morocco/Tunesia, Norway, Netherlands, Portugal, Spain, Sweden, Switzerland, Syria, Turkey, United Kingdom, Vatican City, Yugoslavia.

Associate Members: The broadcasting organisations of: Australia (ABC), Belgian Congo, Burma, Canada (CBC), Ceylon, Haiti, Japan, New Zealand, Pakistan, Portugal, Union of South Africa, United Kingdom, (I.T.A. and Television Programme Contractors Association), United States (US Information Agency, N.A.E.B., C.B.S. and N.B.C.).

Publications: EBU BULLETIN (every two months in English and French) - Long and medium waves Report (European Area) - Short waves report.

INTERNATIONAL BROADCASTING ORGANIZATION OIR
Address: 15, Liebknechtova, Prague 16, Czechoslovakia.
Cable: INTERADIF Praha.

Nature: International organization, having scientific purpose.

Governing Body: General Assembly consisting of one representative for each full member.

ADMINISTRATIVE COUNCIL: Consisting of 7 to 13 members.
Chairman for 1956: Representative of the Czechoslovak Republic.
Vice-Chairman for 1956: Representatives of Finland and of the Peoples Republic of Mongolia.

Members: Peoples Republic of China, Czechoslovak Republic, German Democratic Republic, Peoples Republic of Mongolia, Peoples Republic of Poland, U.S.S.R.

MEMBERS: PR of Albania, Byelorussian SSR, PR of Bulgaria, Chinese PR, Czechoslovak Republic, Estonian SSR, Finland, German Democratic Republic, Hungarian PR, Korean People's Democratic Republic, Latvian SSR, Lithuanian SSR, Moldavian SSR, PR of Mongolia, PR of Poland, Rumanian PR, Ukrainian PR, Union of Soviet Socialist Republics, PDR of Vietnam.

Facilities: Technical Centre: Prague, Czechoslovakia.

Publication: Documentation and Information Bulletin in Chinese, English, French and Russian issued every two months. Technical Documentation and Lists of broadcasting and television stations in operation.

Meetings: General Assembly at least once a year. Administrative Council at least once a year.

Relations with other international organizations: Official relations with the ITU, UNESCO, the Economical and Social Council of the United Nations Organization and others.
Association Interamericana etc.

ASOCIACION INTERAMERICANA DE RADIODIFUSION (AIR):
AIR is an association of the broadcasting corporations of the American countries. Founded in 1946 it represents more than 4000 broadcasting and 400 television stations. Its purpose is to preserve free and stable broadcasting, promote cooperation between broadcasting corporations and the public Authorities, to raise the cultural level of the peoples, and to work for a closer feeling of association between the broadcasting corporations of America. AIR is recognized by the United Nations and collaborates with UNESCO with the International Union of Telecommunications and with the organizations of the Ame-

RADIO AUSTRALIA

- the friendly voice of the Southern Continent -

Radio Australia - The Overseas Service of the Australian Broadcasting Commission - transmits daily programmes in English, French, Indonesian, Chinese and Thai. Transmissions are directed to Asia, the British Isles and Europe, Canada and the United States of America, Africa, New Zealand, and North and South Pacific Islands.

Radio Australia provides varied musical entertainment and regular news bulletins, talks, features and magazine programmes on Australian and international affairs.

A free thirty-two page illustrated programme booklet is available to all listeners upon request.

RADIO AUSTRALIA - OVERSEAS SERVICE - AUSTRALIAN BROADCASTING COMMISSION, MELBOURNE, AUSTRALIA.

(For detailed information see page 105)

How to use the WRH, continued from page 13.

Verification by QSL-cards. As indicated in the survey of the broadcasting services of the various countries, many of the stations listed are interested in receiving reports from listeners in respect of their transmissions. These stations acknowledge reports by sending listeners a QSL-card (verification) or a letter. For most of these stations it is stated whether reports are answered by QSL card or letter and if return postage is required. If nothing is mentioned, it is unnecessary to send reply postage. Many short-wave listeners make a hobby of collecting these QSL-cards which are often elaborately designed and colourful.

Reports from Listeners: Listeners' reports can in most cases be written in English, but Spanish is preferable when writing to South or Central American stations.

In the new edition of *How to listen to the world* you will find all information about how to write your reports to the stations. -

If reply postage is requested by a station, enclose with your reports an International Reply Coupon obtainable at most post offices. The full address of each station will be found in the individual surveys.

How to identify a short-wave station:

Whenever you come across a station which is unknown to you, proceed as follows for identification: Read the approximate frequency indicated on your dial in megacycles or kilocycles or the wavelength in metres. Find from the table of frequencies and wavelengths what station are working in the neighbourhood of the reading shown by your dial. When you have reduced the source of the broadcast to one or two possibilities and at the same time noted details of the program heard and the language used, check these data against the program surveys printed in this Handbook. For confirmation it is advisable to wait for the station announcement or interval signal mentioned previously.

Continued from page 15.

ican States. AIR has subscribed to the "Panama Doctrine" in which the American Radio and Press declare themselves united against any attack on individual liberty and any restriction of the freedom of utterance. During the last General Meeting, held in Lima, Peru, AIR issued a Declaration of Principles of Ethics on which such members as have not yet done it, will have to base themselves for the compiling of their Ethic Codes. On October 4 1956, AIR celebrated its tenth anniversary. Associations in twenty countries are affiliated to AIR, President of AIR is Senor Ricardo Vivado Orsini (Chile), 1st Vice Pres.: Raul Fontaina (Uruguay); 2nd Vice-Pres.: Alberto Lleras Camargo (Colombia); Secretary: Emilio Azcaraga (Mexico); Dir. Gen.: Julio Menadier Carrasco (Chile).

STILL THE WORLD'S BEST
Communications Receivers

◀ **SUPER PRO 600**—The last word in communications receiver engineering. "Super Pro 600"—a 20 tube dual conversion superheterodyne covering the range of 540 Kc to 54 Mc in 6 bands. The universal power supply is an integral part of the Receiver Chassis.

New HQ-100—The most amazing communications receiver ever produced, moderately priced. Continuously tunable from 540 Kcs to 30 Mcs with sensitivity and selectivity surpassing anything in its class. Auto-Response circuit delivers a complete range of audio output.

▶ **HQ 140-XA**—A modern superheterodyne communications receiver with high operational excellence, and still in the moderate price range. Frequency coverage from 540 Kc to 31 Mc.

A Full Line of Communications Receivers for every Requirement

Hammarlund—superb engineering—backed by almost half a century of manufacturing experience. First choice of the U. S. Army, Navy and Air Force, 22 governments, leading airlines,

military, press, commerce. Hammarlund receivers have gained world-wide recognition as the finest, best performing equipment available anywhere at any price.

BROADCASTING

EQUIPMENT

GATES

A full line of AM & FM broadcasting, television transmitters from 250 watts to 50 kw.

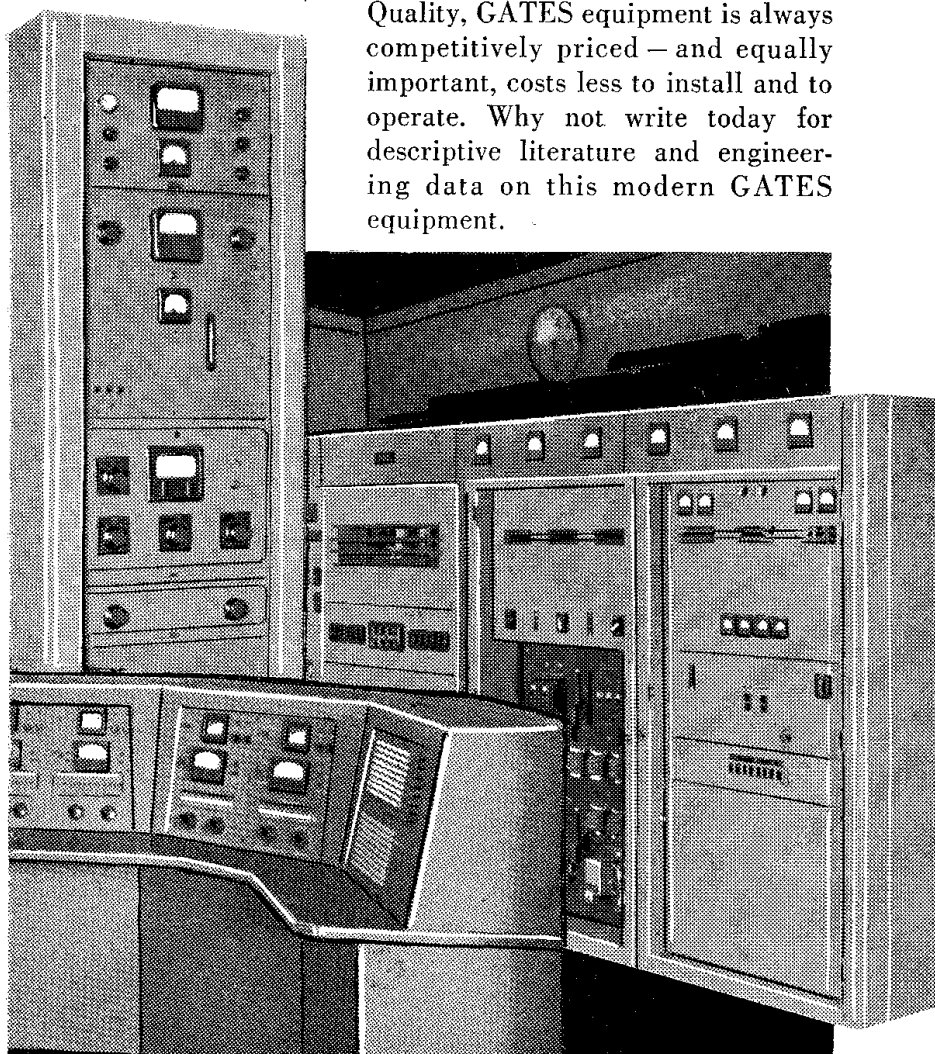

Single or Multi-Channel Communications Transmitters.

Speech Input Equipment • Transmitter Control Consoles • Master Control Consoles • Speech Input Console • Plug-In Pre-amplifiers • General Purpose Consoles • Transcription Turntables • Mobile Sound Effects Console.

Remote Amplifier Equipment • Directional Phasing Equipment • Monitoring Equipment • Oscillators • Remote Control Equipment.

**Manufacturing
Engineers
Since 1922**

GATES is the largest supplier of AM radio broadcasting equipment in the U.S.A. The prime reason for GATES' popularity everywhere, is that while maintaining the highest standards of Quality, GATES equipment is always competitively priced — and equally important, costs less to install and to operate. Why not write today for descriptive literature and engineering data on this modern GATES equipment.

GATES RADIO COMPANY

INTERNATIONAL DIVISION

13 East 40th Street, New York 16, N. Y., U.S.A. Cables: ARLAB

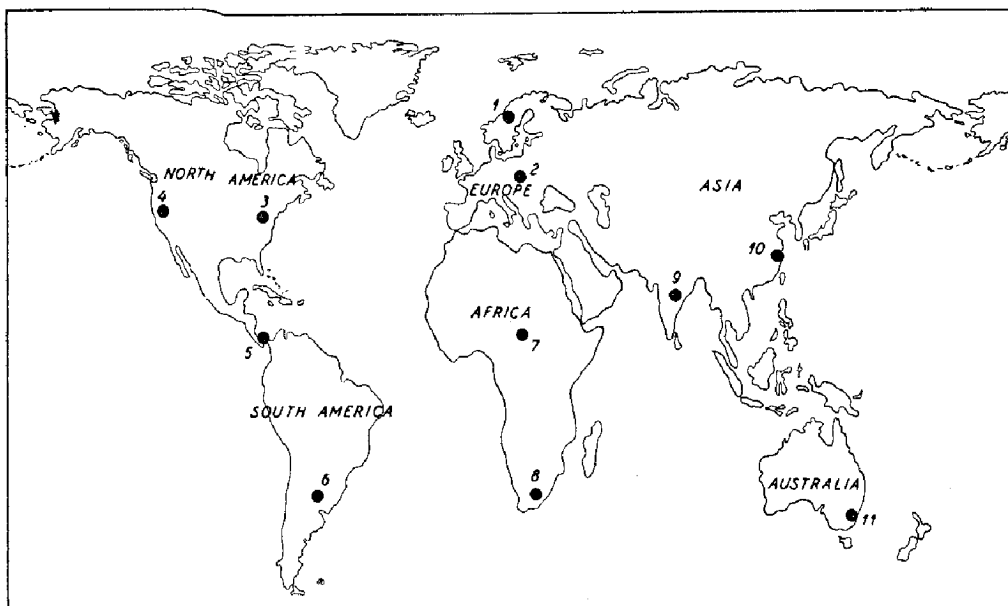

TABLE OF THE MOST SUITABLE METRE BANDS FOR BEST SHORT-WAVE RECEPTION IN EVERY PART OF THE WORLD AT VARIOUS TIMES OF THE DAY IN 1957.

Note: The figures in the table below are calculated for a specific point within each area as indicated on the chart below. The area numbers on the chart refer to the numbers indicated in the left-hand column of the table.

The figures in the table can be regarded only as average figures, as conditions will vary considerably from time to time due to irregularities in the ionosphere.

Example: A listener located in the eastern part of North America (area 3) wishes to hear a station in the southern part of Africa (area 8) on a January evening (21 local time). By following the horizontal column of figures starting at North America, East, on the left until it meets the vertical columns under the area no. 8 in the section for the months November, December, January and February on the right, he will come to the figure 25. This means that the 25 metre bands is the most suitable for listening to the required station at that time.

The listener's area	Local time	Area of the transmitting station

PICTURES FROM THE RADIO-WORLD

1 United Nations Television Facilities: As television passes out of the experimental stage in an increasing number of countries, the television coverage provided by the U.N. Department of Public Information through its Radio Division, both live and kinescope, has shown a steady increase in volume and in the number of languages regularly used. This picture shows a television control room at U.N. Headquarters.

2 Nigerian Broadcasting Service - the Director of Broadcasting M. T. W. Chalmers presents the Osborne Memorial Award 1954 for African Music to Koko, the blind street singer from Lagos.

5 6

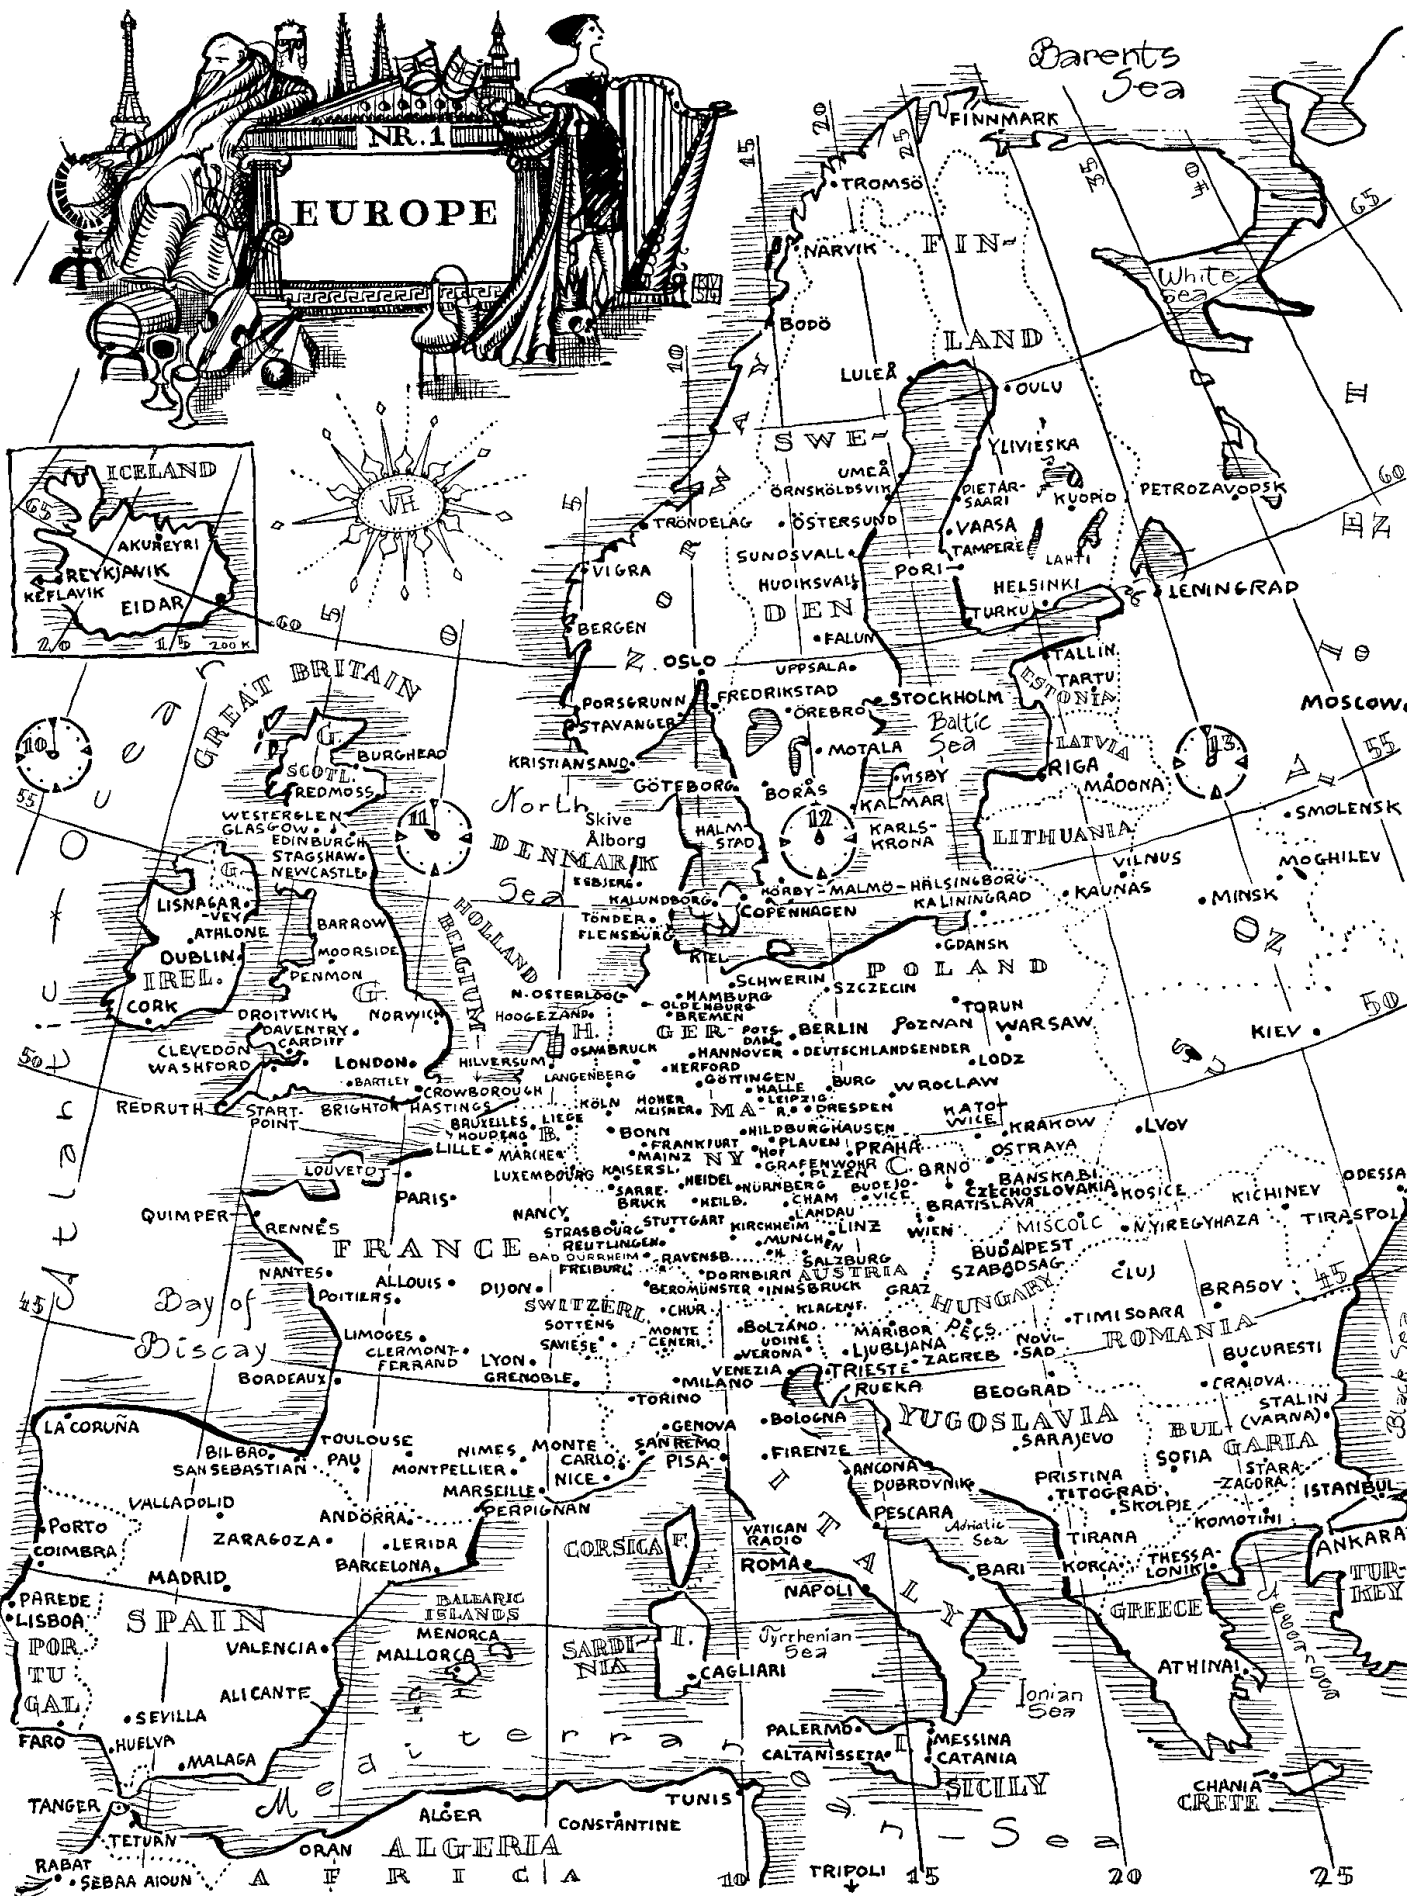

4

3 Radio Canada, Danish Section: Asmund Rostrop, announcer producer in Danish Section of CBC International Service recording interview with citizen of Canada's Maritime Provinces. CBC International Service sends teams of producers from time to time into various areas to get on-the-spot recording material.

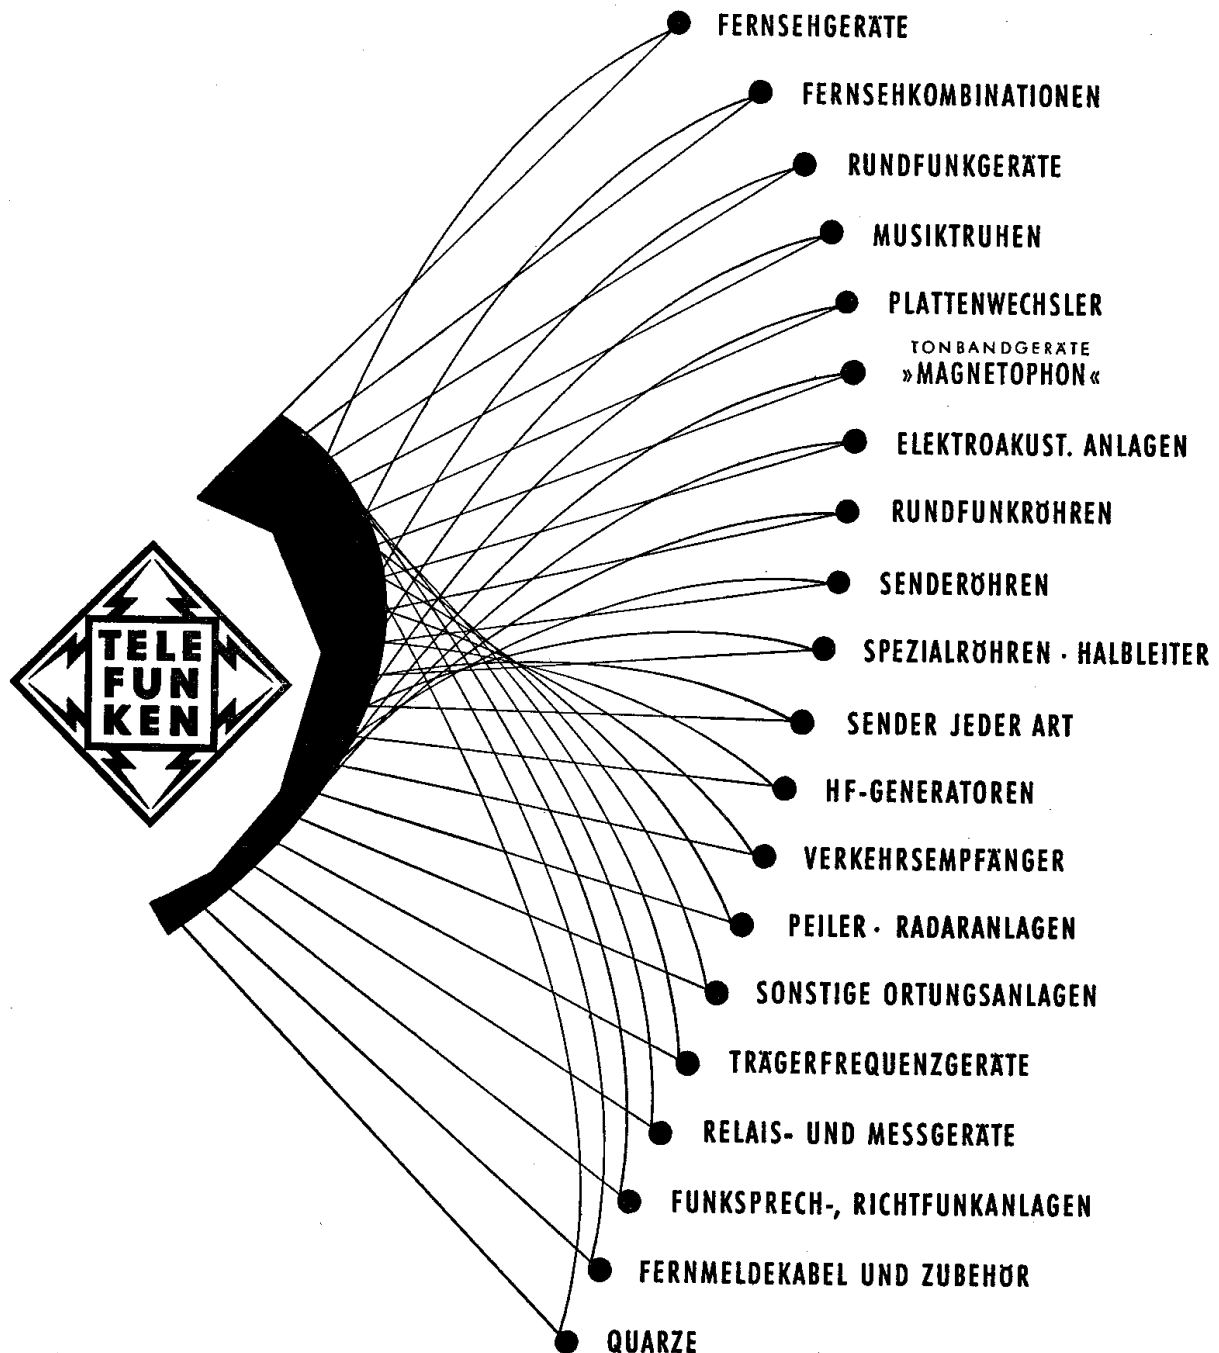

5 Central African Broadc. Station Lusaka: Request-programme announcer Joyce Kalisilila.

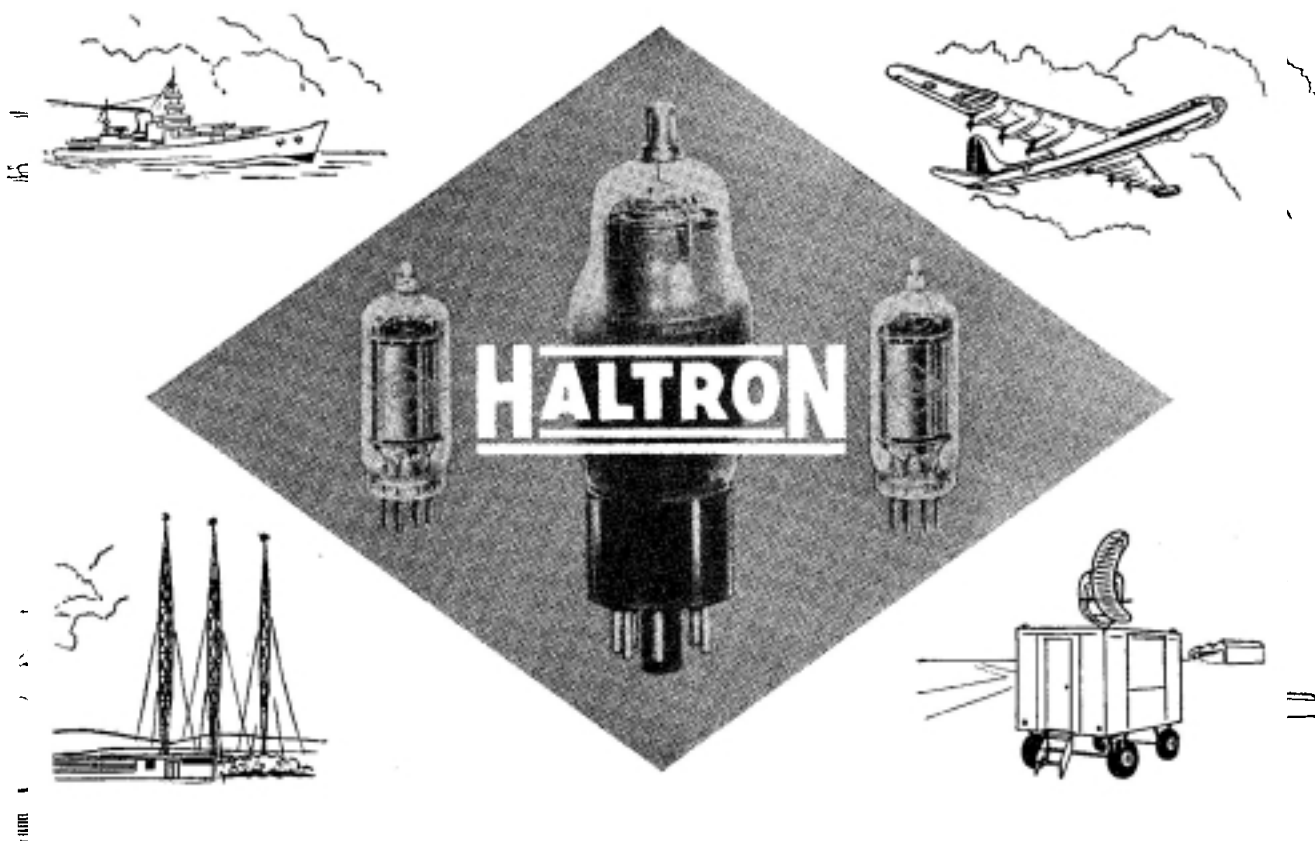

4 Radio Congo Belge: Every week is broadcast a special broadcast for the native listeners arranged by "Le service d' Education de la Force Publique". The photo shows a group of Congolian soldiers singing one of their songs.

6 Europa I Saar: Line Renaud in her popular programme «a vu Line».

TELEFUNKEN

Our organisation is unique, in so far as we have 1,900 types of transmitting, special purpose and receiving tubes in stock.

Already we serve many Broadcasting systems in all parts of the world.

We invite others to contact us with their enquiries.

Tubes supplied, where required, to CV, JAN and MIL specifications.

Our technical department will be pleased to advise on your problems.

Message to WRH, continued from first page.

ASOCIACION DE RADIODIFUSORAS DE CHILE.

It is a special satisfaction for us to get the opportunity to congratulate you to this publication, which contains complete and up-to-date information about World Broadcasting and Television.

Ricardo Vivado O., Presidente

TURKISH PRESS, BROADCASTING AND TOURIST DEPARTMENT.

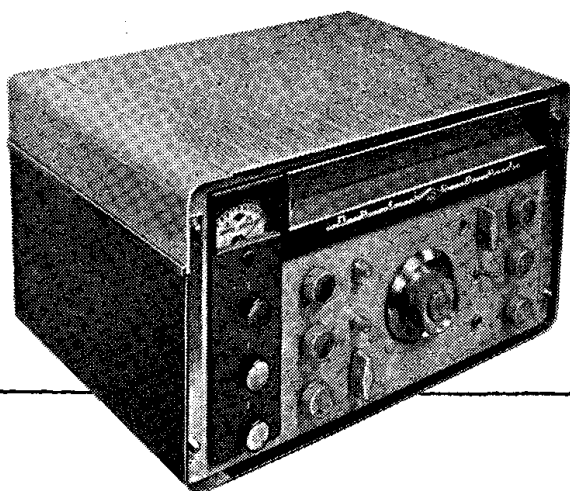

"On behalf of my staff, and personally, I should like to congratulate you for a job you have been doing so well for several years. The WRH develops continuously from year to year. It contains a wealth of information accurately and attractively presented, which makes it a

standard reference volume for our entire broadcasting staff. Besides, its value as a contributor to international understanding, is indisputable."

Salih Akgöl, Director General a. i.

RADIO - AFRICA - TANGER:

We thank you for your valuable endeavours to distribute all over the world information about Broadcasting and Television—a work of great value—not only for listeners, but also for broadcasting organizations. — Our heartiest congratulations to the WRH, which by help its information allow us all to find easy and quick the frequencies of the different broadcasting stations as well as the hours of the transmissions. In this way we learn about the culture and the thoughts of the other nations and their news etc. which altogether serve the great principle of the United Nations: Promotion of the understanding between the peoples of the world. — J. de Bournet, Adm. Dél.

Here are just a few of the many NC-300 features

tuned to tomorrow

NATIONAL COMPANY, INC.

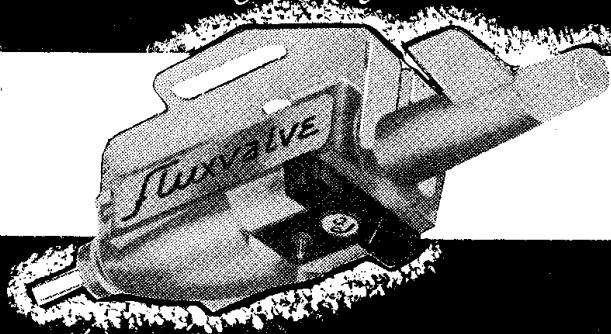

c/o Ad Auriema, 89 Broad St., New York, N. Y. U.S.A.

National

Features the greatest sensitivity of any ham receiver at any price (3-6 db noise figure on all amateur bands) plus . . . greater stability than most receivers costing up to \$695.

- Features a total of 10 dial scales for coverage of 160 to 1 1/4 meters with National's *exclusive* new converter provision with the receiver scales calibrated for 6, 2, 1 1/4 meters using a special 30-35 mc tunable IF band.
- Longest slide rule dial ever! More than a foot long! Easily readable to 2 kc without interpolation up to 21.5 mc.
- 3 position IF selector—.5 kc, 3.5 kc, 8 kc—provides super selectivity, gives optimum band width for CW, phone, phone net or VHF operation.
- Separate linear detector for single sideband "on" with single sideband . . . will not block with RF gain full open.
- Hi-speed, smooth inertia tuning dial with 40 to 1 ratio! Provides easier, more accurate tuning. Smoothest dial you've ever used.
- Exclusive optional RF gain provision for best CW results allows independent control of IF gain!
- Giant, easy to read, "S" meter!
- Provision for external control of RF gain automatically during transmitting periods.
- Muting provision for CW break-in operation.
- The newest look in ham receivers . . . "Massive in the modern manner" . . . truly a "dream receiver" that can be used either as a table or rack model!

Choice of Professionals

THE PICKERING "350"

The long record and stylus life essential to commercial operation is assured by the low tracking force (2 to 6 grams) of the "Fluxvalve 350" magnetic turnover pickup. Higher compliance and lower vibratory mass result in superior performance. One mil and half mil stylus, low and high impedances.

EUROPEAN SERVICES:

STATIONS: Long and Medium Waves:

200 kc/s 1500 m - 1295 kc/s 232 m FM: Berlin 87.5 mc/s

647 - 464 - 1340 - 224 -

The two columns below show the wavebands, which the BBC expects to use during the months from April to September and October to March. There will, however, be changes of both wavelengths and wavebands - sometimes of short notice - and listeners are advised to listen to announcements which will cover all such changes. Detailed wavelengths information can be obtained from the prgr. journals.

Selection of wavelengths subject to periodical changes! These 4 Sunday programmes, produced and presented by Edward Startz, are of 90 minutes duration, consisting of: Musical entertainment linked by polyglot announcements. They are usually supplemented by features of universal interest. Special programmes in Spanish and Portuguese for the Latin countries. "Mailbag" answering listeners' mail by calls to all parts of the globe. From its inception in 1928 - with exception of the war years - 1957 marks the 29th year of the "Happy Station" round the world broadcasting.

The "Happy Station" programmes are on the air every Sunday at the following times:

Sun. 10.30-11.58 (A) to FE, Au, NZ.
Sun. 16.00-17.30 (B) to ME, Af, Eu.
Sun. 21.30-23.00 (C) to Sp, Port, SAM.
Mo. 02.30-03.55 (D) to NAm.

ANN.: Dutch: "Hier Radio Nederland in Hilversum". E.: "This is the International Service of Radio Nederland in Hilversum, Holland". In. "Disini Hilversum, Siaran Indonesia Radio Nederland". - Sp.: "Aqui Radio Nederland de Hilversum, Holanda". - Arabic: "Huna Hilversum - al-idha'atu'l hulandiya bi'l-lughati'l-Arabiya -".

GENERAL INT.-SIG.: Old Dutch folk-song called: "Merk toch hoe sterck" played on carillon or celesta on all frequencies

VER. by letter or QSL-card. - PUBLICATIONS: Prgr. bulletins in Dutch, E., Sp., Afrikaans, Arabic and In. are sent free of charge on application. - F.P.L.: In the course of 1957 the accomplishment of the new transmitting station is expected consisting of three 100 kW transmitters and one 50 kW with an extensive antenna-system. A part of it is already in operation.

FOR NORWEGIAN SEAMEN in the N. Atlantic and the N. Sea:
Tromsø Short Wave Transmitter broadcasts daily the entire Home Sce. Prgr.: On 9550 kc/s until 15.00, and on 7210 kc/s after 15.00.

ANN.: "This is R. Norway with its short wave service for Norwegians abroad".

INT.-SIG.: Every s.w. transmission is introduced by the following theme, which originates from an ancient folk tune from Hallingdal:

Five minutes previous to every short wave transmission the following signal is sent:

Message to our English-speaking audience: In our daily special programmes for Norwegians abroad we will usually have a section of Norwegian music or music presented by Norwegian artists. This musical section, which lasts 15 to 20 minutes, is introduced in English as well as in Norwegian. On Wednesdays and Saturdays you can listen to our "Letter Box Programme", in which we play our listener's request records. We often receive letters from listeners in Norway with request to play a record with a greeting to one of their relatives abroad, but we regret to be unable to comply with these requests.

Every Sunday we have an additional programme in English, "Norway this week", in which we try to present Norway in different ways through music and feature programmes. We are very grateful for comments on our transmissions. Reports are answered by QSL-card. Return postage is not necessary. Our postal address is: RADIO NORWAY, Oslo, Norway.

PUBLICATION: Programbladet (weekly).

You are invited to tune in to

IBRA RADIO

The Free Christian Radio, transmitting daily over Radio Africa, Tangier, on the Short Wave and over Radio Africa, Maghreb, on the Medium Wave.

Transmissions are in 12 languages
and further languages will be added during 1957.

IBRA RADIO broadcasts :

- SONGS AND MUSIC
- RELIGIOUS SERVICES AND DEVOTIONS
- REPORTS AND INTERVIEWS
- LITERARY READINGS AND EXTRACTS
- CHILDRENS' AND YOUTH PROGRAMMES
- ADVERTISEMENTS ETC.

Details regarding programmes and wave lengths, with comments, are issued in Dagen, the largest Christian daily newspaper in Sweden. IBRA RADIO, also has it's own magazine, (IBRA) which publishes, in the Swedish edition, the monthly programmes, together with interesting articles concerning IBRA RADIO and other Radio Stations. There is also an English edition of 'IBRA'. A copy of each edition of 'IBRA' is sent to persons joining the IBRA RADIO Federation — The International Listeners Association. Further information about this may be obtained from IBRA RADIO FEDERATION, P.O. Box 821, Stockholm 1, Sweden.

Reception Reports, programme suggestions and requests are welcome. Reports may be sent to the different IBRA RADIO offices, and will be confirmed by a particular QSL Card for each office country. From Tangier a Swedish, English or Spanish QSL Card will be sent according to the language of the report.

Moscow, Kreml

MOSCOW CALLING

What USSR broadcasts about

The Soviet Union covers a sixth of the globe. In order to travel through the country from west to east—from the Polish frontier to the Pacific coast—a passenger in an express train requires fourteen days. When the rising sun gilds the summit of Kljutjevskij in Kamtjatka, the inhabitants in the western areas are just going to bed. From the cold pole in Jakutsk, where the thermometer often registers 70 degrees below freezing point, to the hot desert of Karakum, where the temperature reaches 60 degrees (C), one meets the most various climatic conditions. The fauna and flora of the country are extraordinarily diverse. Its natural resources are unlimited.

The population of USSR exceeds 200 millions. There are Russians, Ukrainians, White Russians, Lithuanians, Gruzes and Moldavians—people of over sixty nationalities.

Moscow broadcasting station tells about life in this country, and transmits in 35 different languages.

The programmes comprise reports on sporting events, concerts, literary programmes. Listeners are informed about science and techniques, new books, theatre and film shows. Moscow broadcasting station also comments on the most important international events. There are special programmes for women, for children and for young people. In these programmes are given answers to letters from listeners and the records people have asked for; information is given concerning the life of Soviet Russian women, and about students and school children.

Foreign guests are broadcast over the Moscow station—political personalities from abroad, representatives of business circles, scientists, artists, people of different religions, workers, and peasants visiting the Soviet Union as tourists or as members of various delegations.

Moscow always replies to its listeners by radio and letter, sending them various souvenirs and prizes for participating in the competitions of the Moscow station.

LISTEN IN TO MOSCOW!

MANILA BROADCASTING COMPANY

Teen-age life, love and laughter are hilariously portrayed on DZRH's latest addition to its roster of big shows in the NUMBER ONE PROGRAM, presented by Lifebuoy soap every Wednesd. at 12:30 GMT. Central figures in the radio comedy are Mr. and Miss Number One (Juancho Gutierrez and Amalia Fuentes), two new big stars from Sampaguita Pictures.

SHARQ AL ADNA, CYPRUS

has led the way in the M.E. to a more intelligent and enterprising use of broadcasting in the popular field. Its variety shows have a particular appeal and draw many thousands of letters a week. Shamel and Mir'i, two popular Lebanese comedians, are regular contributors to Sharq's programmes.

VOICE OF AMERICA (Govt.) Continental USA.

"THE VOICE OF AMERICA" is operated by the Broadcasting Service of the U.S. Information Agency. The VOA seeks to promote an increased understanding of the United States among the peoples of the world and to strengthen cooperative international relations. VOA radio relay installations are located at Honolulu, Manila, Colombo, Okinawa, Munich, Tangier, Salonika and aboard VOA's floating transmitter - the U.S. Coast Guard Cutter COURIER. Relay facilities are also leased from the BBC.

Programs are written, produced and broadcast from studios in Washington, D.C., New York City and Munich, Germany.

RELAY STATIONS:

For frequencies of the relay stations, refer to the individual countries: Germany, Greece, Dodecanese Islands, Great Britain, Tangier, Ceylon, Hawaii, Okinawa, and Philippines.

ANNOUNCEMENT:

Each program ends with these words spoken in English: "This program has come to you from the United States of America." The station identification is then announced in English.

VERIFICATION:

By QSL-card. No return postage required.

ARMED FORCES RADIO and TELEVISION SERVICE

ADDR.: Office of Armed Forces Information and Education, Washington 25, D.C.

This office exercises overall policy control of the Armed Forces Radio and Television Service. The mission of AFRTS is to keep United States service men and women stationed outside the States the best informed service personnel in the world on current events. All broadcasts are in English. Entertainment and educational programs go out in disc form, to be broadcast to local military audiences by 69 armed forces radio stations in overseas areas. News, sports and other timely matter is beamed overseas directly by twelve powerful transmitters on the U.S. Atlantic and Pacific coasts. These shortwave broadcasts serve both the overseas radio stations, which relay them locally, and the more remotely situated individual military listeners with their own shortwave radio receivers. Programmes other than news and locally produced programmes are derived directly from the U.S. Commercial

U.S.A.

Networks. News is compiled directly from the wires of A.P., N.P. and JNS.

AFRS presents regular shortwave programmes from both Los Angeles and New York City, using the transmitters of the Voice of America.

NATIONAL ASSOCIATION OF EDUCATIONAL BROADCASTERS.

The national independent professional association which since 1925 has represented the interests and needs of educational television and radio broadcasters represents approximately 73% of the educational stations and production centers of the United States (approximately 90%, excluding those identified as theological or religious stations).

Address: Executive Office: 14 Gregory Hall, Urbana, Illinois.

Leading Personalities: Pres.: Frank E. Schooley, Vice-Pres.: John Dunn. Executive Dir.: Harry J. Skornia, Associate Dir.: Harold E. Hill.

Stations: 116 educational institutions and organizations owning and operating a total of 123 educational radio and 20 educational television stations. - AM-stations: 23. - FM-stations: 95. - TV-stations: 20.

Activities and Functions: The NAEB is the Association of American institutions operating educational, cultural and public service radio and television stations and production centers. Its services include workshops, seminars, regional and national annual conferences, personnel-upgrading programs, engineering, legal, research and other operational consultant services, an employment agency, and numerous publications in radio and television, including a monthly Newsletter. It maintains an active production program and has an exchange-advisory membership relationship with most national educational organizations. The NAEB also operates a radio network which duplicates via tape and distributes to member stations several hours of programming per week. At present there are some 70 stations in this network.

It also actively cooperates with various international organizations (European Broadcasting Union, Prix Italia, International University of the Air, UNESCO, etc.), and the national systems of various other countries (Radiodiffusion Television Française, BBC, RAI and others), exchanging programs, publications and personnel with the broadcasting organizations of over 20 nations in Europe, Asia, Australia and Africa, as well as those in North, Central, and South America.

COMMERCIAL STATIONS

COMMERCIAL STATIONS: In operation 2931 AM st., 522 FM st. Medium Wave Stations, 50 kW. stations only.

A "daytime" station may operate only during the period between the times of local sunrise and local sunset. It must maintain a minimum operating schedule including at least two-thirds of the hours between 6 A.M. and 6 P.M. local standard time. On certain channels, and subject to the condition that interference is not caused to unlimited time stations in regular operation daytime stations may begin operation as early as 4 A.M. local standard time. - "Daytime" stations marked**).

An "unlimited time" station has a nominal broadcast day extending from local sunrise to midnight, and must operate at least two thirds of the hours between 6A.M. and 6P.M., and two thirds of the hours between 6 P.M. and midnight. In addition, such stations, may, if they desire, operate during the period midnight to 6 A.M. "Unlimited time" stations marked*)

Adv.

ONDAS DEL LAGO is 10 years ahead of the Venezuelan radio transmission thanks to its up-to-date and powerful sender and also its wonderful antenna in the very lake of Maracaibo. ONDAS DEL LAGO which is always leading in every radio transmission, occupies its own modern radio- and television centre in the most suitable and desirable location in the new area of the city covering 4000 sq. meters and out of which the 2400 sq. meters are built and equipped with the most up-to-date technical plant. ONDAS DEL LAGO covers the entire territory of the nation and the message of the advertisers reaches the most distant and also the most important markets of Venezuela. In the near future a 50 kW long wave station will be installed.

World Television

WORLD TELEVISION

The principal television systems:

Definition refers to the broadcast standard which is normally stated in terms of the number of lines which make up the image. Reference in the following surveys is made throughout merely to 405 lines, 525 lines, 625 lines (CCIR*), 625 lines (Sovjet**) and 819 lines respectively.

Details of these five definitions are given in the following table:

	Systems			
Number of lines per picture	405	525	625*	819
Video bandwidth (Mc/s)	3	4	5	10.4
Channel width (Mc/s)	5	6	7	14
Sound carrier relative to vision carrier (Mc/s)	-3.5	+4.5	+5.5	-11.15
Sound carrier relative to edge of channel (Mc/s)	0.25	-0.25	-0.25	+0.10
Interlace	2/1	2/1	2/1	2/1
Line frequency (c/s)	10,125	15,750	15,625	20,475
Field frequency (c/s)	50	60	50	50
Picture frequency (c/s)	25	30	25	25
Sense of vision modulation	Positive	Negative	Negative	Positive
Level of black as percentage of peak carrier	30	75	75	25
Sound modulation	AM	FM	FM	AM

*) The International Radio Consultative Committee.

**) The characteristics are the same as 625 lines CCIR exc. for a difference in bandwidth: video bandwidth 6 Mc/s, channelwidth 8 Mc/s, sound carrier relative to vision carrier +6.5 Mc/s.

THE SPREAD OF TELEVISION

TV receivers in use throughout the world has passed 50,000,000.

The following pages give you the data of the different TV stations of the world. The channel is indicated by a letter followed by a figure. The letter indicates the technical data of the systems which are in use (A: American, B: British etc.) and the figure is the channel number. The powers for vision and sound are indicated by a fraction, the numerator indicating the number of kW (ERP) for vision and the denominator for sound, for example 6/1.5 means vision. 6 kW ERP and sound 1.5 kW ERP...

GERMANY

GERMAN FEDERAL REPUBLIC

Television has been developed by the various radio organizations (Rundfunkanstalten) and especially the Nord- and Westdeutscher Rundfunk. - A common prgr. is being broadcast throughout Germany under the title "Deutsches Fernsehen". Each of the organizations participates in the production of this prgr. In addition a number of regional broadcasts are transmitted by each of the broadcasting organizations. Relay Facilities for the German television network are constructed by the German postal authorities: The network consist of 50 relay stations (Dezimeter, directional); the main-connections are: Hamburg - Köln - Feldberg Taunus - Frankfurt - Stuttgart - Baden-Baden - München. Seven broadcasting organizations have 22 transmitters and ten frequency-changers (low power transmitters without Dezimeter-connection with the German network). Five border-stations are used for foreign program-exchange.

Community television prgr. daily approx.: W. 15.30-16.30, 19.00-21.00. Sun. additionally 11.00-11.30 and longer afternoon-programmes in case of sport-events. Testtransmissions approx.: 09.00-18.45 (each station has different times).

ADDR.: Fernseh-Kommission der Arbeitsgemeinschaft der Westdeutschen Rundfunkanstalten, Hessischer Rundfunk, Frankfurt am Main.

BAYERISCHER RUNDfunk (Anstalt des öffentlichen Rechts).

ADDR.: Fernsehleitung, Rundfunkplatz, München. - L. P.: See Germany. Dir. Television: Dr. Clemens Münster. Chief-Editor: Robert Lembke. Chief-Studios: Heinrich Fischer. Dir. Produktion: Kurt Hinzmann. Chief. Production: Willy Reiber. -

Stations: Wendelstein: ch. E10, 100/20 kW. - Dillberg ch. E6 100/20 kW. - Exp. St.: Kreuzberg ch. 3 100/20 kW. - Ochsenkopf ch. 5 1/0.2 kW. - Würzburg ch. 10 0.1/0.02 kW. - Projected Stations: Grunten/Allgäu 100/20 kW (end of 1956). - Brotjackriegel 100/20 kW. - Test transmissions: 09.00-10.00, Mo.-Fri. 13.30-15.00.

NORD- AND WESTDEUTSCHER RUNDfunk-VERBAND (NWRV)

"Gemeinnützige Körperschaft des öffentlichen Rechts" (a corporation for public benefit).

Members: Der Norddeutsche Rundfunk, Hamburg and Der Westdeutsche Rundfunk, Köln. NWRV is committed to produce 46% of the German Common Televisionprogrammes.

ADDR.: NWRV-Fernsehen, Gazellenkamp 57, Hamburg-Lokstedt 1, Cable: Fernsehen, Hamburg. - Studio Köln: Köln a/Rhein, An der Rechtsschule. Cable: Fernsehen, Köln. - L. P.: Dir. Gen. For Advertisers: Facts prove, that the world wide "buyer contact" distribution of WRH makes it one of the soundest and most economical export advertising media. Brochure and rates from: World Radio Television Handbook, Lindorffsallé 1, Hellerup, Denmark.
To make sure of space post your letter today.

*To get the most out of
World Listening*

read
the new edition of:

HOW TO LISTEN TO THE WORLD

World listening made easy by help of How to listen to the world. This companion to the WRH sets out to help all interested in world-listening to get the

best from their receivers, by giving hints and tips on short-wave reception. - It explains in simple language, illustrated by useful drawings and tables, how to set about finding, identifying and logging foreign stations and getting good results throughout the year.

Used in conjunction with the WRH, it will enable you to enjoy better, trouble-free radio, and at the same time increase your knowledge of the world at large.

Price: Dan. Kr. 4,50 - £ 0/4/6 - \$ 0,65 - DM 3,00 -
Fr. 225 plus postage

WORLD RADIO BULLETIN

A supplement to the WRH, which fortnightly will bring you the latest news from broadcasting stations all over the world: New stations, changes of frequencies, hours of transmission and powers etc.

By help of the WR-bulletin you will be able to keep the contents of the WRH up to date and the WR-bulletin will give the broadcasting organizations a valuable knowledge of the activity of other broadcasting organizations.

The WR-bulletin acts as a valuable link between broadcasters and listeners.

The prices are:

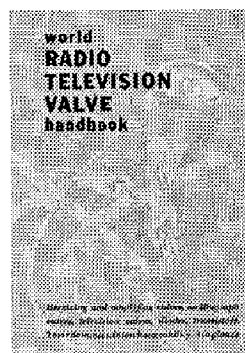

By airmail: Annually Danish Kr. 36.-, £ 2/-/-, \$ 5.50, DM 22.00 or Frs. 1800. Quarterly: Danish Kr. 10.-, £ 0/11/-, \$ 1.50, DM 6.00, Frs. 500.-

By ordinary mail: Annually: Danish Kr. 22.-, £ 1/6/0, \$ 3.50, DM 15.00, Frs. 1100. Quarterly: Danish Kr. 6.00, £ 0/7/0, \$ 1.25, DM 4.25 or Frs. 300.-

Order the WR-bulletin:

WORLD RADIO HANDBOOK

Lindorffsalle 1, Hellerup, Denmark

A NEW WORLD WIDE REFERENCE BOOK

World Radio Television Valve Handbook

gives the radio engineer and the radio technician *at a glance* the correct answer to any practical question concerned with receiving and amplifying valves, T.V. and cathode-ray valves, crystal diodes and transistors of any make

DATA, REPLACEMENT OR SUBSTITUTE VALVES, CLASSIFICATION, BASE AND PIN CONNECTIONS

Price: Dan. Kr. 13.50 - £ 0/13/6 - \$ 2.50 - DM 09.00 - Fr. 675 plus postage.

*Published by
World Radio Handbook, Lindorffsalle 1, Hellerup, Denmark*
